Large format printing for individual project solutions

The durlum large format printer allows high-quality printing of any motif for indoor and outdoor areas. Individual printing is possible on a wide range of materials, such as metal, glass and different plastics. The printer's versatility offers you design options which have not been feasible until now.

Technical details

Print sizes:

- Maximum media size:
 - Cut: 3048mmx1524mm
 - Canted metal plate: 2800mmx1300mm
- Maximum material thickness: 100mm

Printing rate [media size: 3048mmx1524mm]:

- Quality 1: 600x900dpi | suitable for photo-quality prints with finest colour nuances
- Quality 2: 400x400dpi | suitable for printing full-surface motifs with medium or high level of attention to detail

Number of colours:

- CMYK
- White [must be created in the print file as special colour!]

Protective varnish:

- Transparent powder coating of the printed metal plates is possible in order to protect the surface. However, this will change the colour effect of the print.

Printable materials:

- Metal
- Glass
- Plastic

Print templates:

- Vector graphics [file format: eps | mode: CMYK, optionally with white as special colour]
- Photos [file formats: tiff, jpg | colour mode: CMYK | resolution: 300 pixels/inch]
